

Grassland Habitat

PRE-K • TK • KINDER

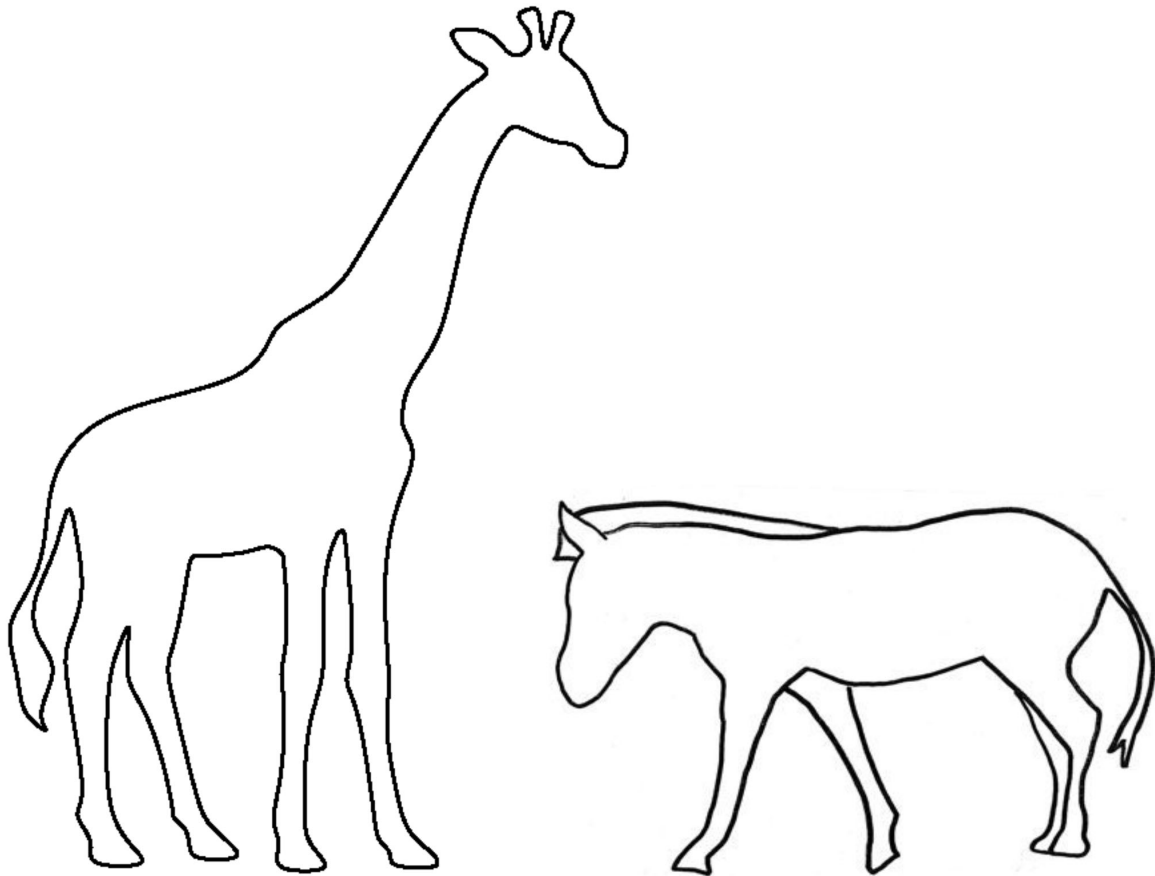

WORKSHEET

Extended Learning Partnership

Grasslands

In the grasslands there are many herbivores, or animals that eat plants. First, give the giraffe some spots and then draw some leaves for the giraffe to eat. Next, draw some stripes on the zebra and color in some grass for the zebra to eat.

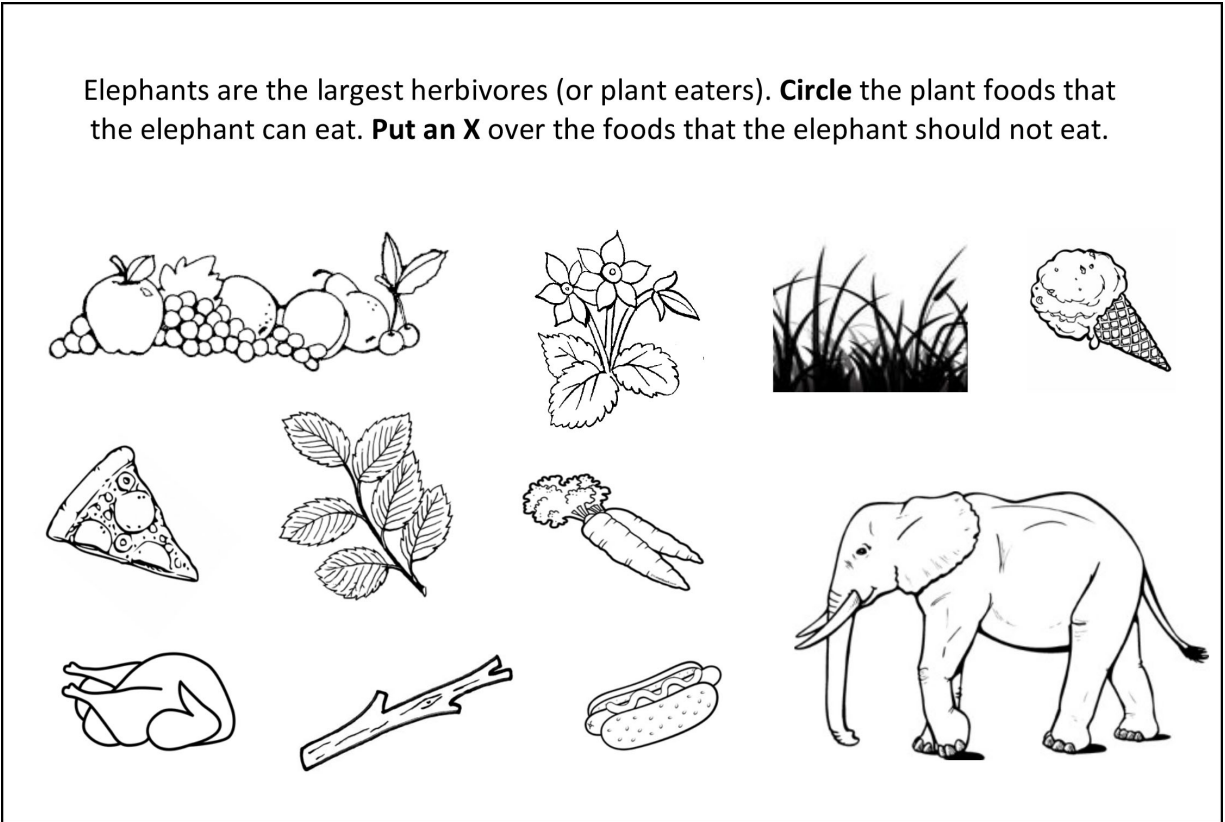

My favorite plant to
eat is a _____

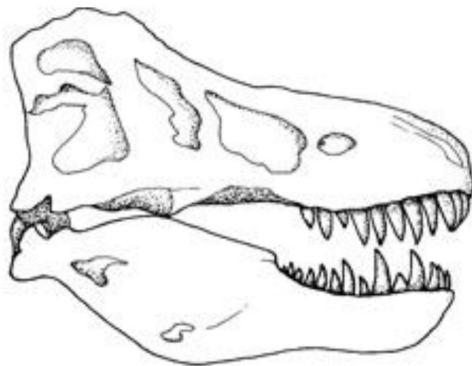

Grasslands

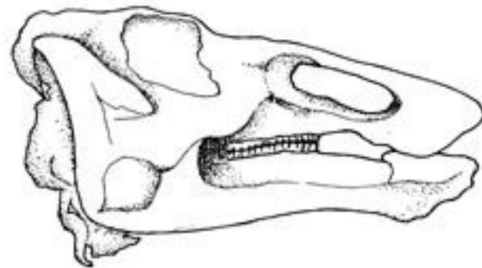

Elephants are the largest herbivores (or plant eaters). **Circle** the plant foods that the elephant can eat. **Put an X** over the foods that the elephant should not eat.

Carnivore Teeth

Herbivore Teeth

What do you notice that is different about these two skulls and their teeth?

The carnivore teeth are sharp for cutting meat.

Herbivore teeth are flat for grinding plants.
